

PART I Authorization to Operate

- A. The permittee is authorized to operate Class V Injection Wells, at the facility described in the permit modification application dated July 22, 2009, and in the cover page of this permit, in accordance with the provisions set forth in this permit.
- B. This permit and the authorization to inject shall remain in effect until the expiration date stated on the cover page of this permit. If the permittee desires to continue injection past the expiration date of this permit, the permittee shall request a permit reissuance at least 180 days prior to expiration of this permit.

PART II Construction Requirements**A. Injection Well Requirements**

- 1. The permittee may inject the calcium peroxide and modified Fenton's reagent solutions as described in the permit modification application dated July 22, 2009 and related information submitted to the Department on September 15, 2009 .
- 2. The permittee shall provide a means of sampling the injection fluids prior to injection.

B. Modifications

Approval of the Alabama Department of Environmental Management (ADEM) shall be obtained prior to modification of any injection well or supporting surface. Modification shall mean any action that will change the configuration of the well beneath the surface, the methods of monitoring injection, or will result in injection of a fluid not specifically authorized by this permit.

PART III Monitoring and Operating Requirements**A. Injection Fluids**

The permittee shall not inject any substance that is defined as hazardous or toxic by Federal or State laws or regulations or any substance not identified in the applications for this permit. The proposed use of substances other than those identified in the permit applications must be reviewed and approved by the ADEM prior to use.

B. Monitoring Wells

- 1. The permittee shall monitor and limit groundwater in accordance with Appendix A. The injection activity shall not result in the exceedence of any established MCL in groundwater outside the areas of contamination.
- 2. The groundwater monitoring regime must be sufficient to detect any adverse affects to groundwater quality due to the injection activity. The Department may change the sampling requirements if the sampling data indicate a need to do so.

C. Operation

The injection wells operated under this permit shall function properly and the injection fluids shall not surface. Should the injection wells fail to function properly, the permittee shall take corrective action, to include cessation of injection, as required by ADEM.

PART IV Records, Reports, & Submittals

A. Records

1. The permittee shall retain all records concerning the data used to complete the permit modification application, the operation of the wells, and the nature and composition of substances injected; to include records of the calibration of instruments, meters and gauges, quality control records, and recordings from continuous monitoring instrumentation; until at least three years after the closure of wells.
2. When requested by ADEM, the permittee shall deliver copies of any of the records maintained in accordance with this permit.

B. Reports

1. The permittee shall submit to ADEM written confirmation of all injection of permitted substances. The confirmations shall include the information listed below:
 - a) The dates of the injection.
 - b) The amount of each substance injected.
 - c) The location(s) of the injection.
2. The permittee shall submit to ADEM ground water monitoring reports on a quarterly basis. The reports shall include as a minimum:
 - a) The date, and exact place of sampling;
 - b) The complete chain of custody forms for all samples collected and
 - c) The results of each analysis performed.

3. The permittee shall report to ADEM any of the following:
 - a) Any planned action which will change the use of the injection wells, will result in injection of a fluid different from that authorized by this permit, will change the method of operations of any injection well, or will change the method of the monitoring of well operations or injected fluids.
 - b) Any planned transfer of ownership of all or part of the permitted facility.
 - c) Any relevant facts of which the permittee becomes aware which should have been submitted in a permit modification application and any corrections to data previously submitted in a permit application.
4. Other Submittals

Studies, engineering reports, plans and specifications, plugging and abandonment plans, logging reports, and other technical documents submitted to comply with this permit shall be prepared by or under the supervision of qualified persons defined by Rule 6-8-.13 of the UIC Regulations of the ADEM.

PART V Plugging and Abandonment

The permittee shall perform any abandonment and closure actions that may be required by the Director of the ADEM to remove a threat to groundwater quality or to the health of persons which is caused by the injection activity.

PART VI Permit Modification, Revocation, Suspension, and Termination

- A. ADEM may impose emergency additional conditions to this permit when necessary to protect waters of the state from pollution. These conditions may include suspension of the permit to inject and shall remain in effect until the permit is modified, revoked, suspended or terminated in accordance with 6-8-.12(a)3-5 and 6-8-.12(f) of the UIC Regulations of ADEM.
- B. Non-emergency permit modification, revocation, suspension, and termination actions shall be accomplished in accordance with ADEM Administrative Code Rule 335-6-8.

PART VII General Provisions

- A. The permittee shall comply with all provisions of the UIC Regulations of ADEM and shall comply with all provisions of this permit and shall reduce or halt injection if needed to maintain compliance with the permit and regulations.

- B. The permittee shall comply with all applicable Federal and State hazardous waste management regulations.
- C. The permittee shall allow members of the ADEM staff to:
 - 1. access property and records of the permittee for purposes of inspection.
 - 2. collect samples of the injected fluids, process and wastewater streams associated with the permitted injection wells.
 - 3. collect samples from any monitoring wells.
 - 4. obtain copies of records upon request.
- D. The permittee shall immediately take all reasonable steps to minimize or correct any adverse environmental impact resulting from the operation of the permitted injection wells.
- E. This permit does not convey any property rights of any sort, or any exclusive privilege.
- F. The filing of a request by the permittee for a permit modification, revocation, and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.
- G. Any noncompliance with this permit constitutes a violation of the Alabama Water Pollution Control Act and/or the Underground Injection Control Regulations and is grounds for enforcement action such as permit termination, revocation, modification; or denial of a permit renewal application.

APPENDIX A

Groundwater monitoring wells MW-4, MW-5, MW-7, MW-10, MW11, and MW-12 shall be sampled quarterly as specified below. The monitoring wells shall be limited by the permittee as specified below

<u>EFFLUENT CHARACTERISTIC</u>	<u>UNITS</u>	<u>DISCHARGE LIMITS</u>	<u>MONITORING REQUIREMENTS</u>	
			<u>FREQUENCY</u>	<u>SAMPLE TYPE</u>
pH	standard units	6.5-8.5	quarterly	Grab
Total Iron	mg/l	0.3*	quarterly	Grab
Sulfate	mg/L	250	quarterly	Grab

* Due to the fact that Iron can sometimes be naturally found in levels that exceed drinking water standards and since iron is not normally a severe health risk, the permit will allow the discharge to continue as long as the discharge does not cause a significant rise in levels above natural conditions.

ADEM Permit Rationale

Date: September 18, 2009

Prepared by: Joe Kelly

Permit Applicant: CSX Transportation, Inc-attention Matthew Adkins, 351 Thornton Road, Suite 125, Lithonia, GA 30122

Site Name: CSXT Derailment Q57229

Location: approximately 500 feet North of the railroad grade crossing with County Road 6 in Castleberry, Conecuh County, Alabama. Latitude N31.30136° Longitude W87.01961°

UIC Permit Number ALSI9918001
Draft Permit is:

First Issuance
Reissuance Due to Expiration
Modification of Existing Permit

<input type="checkbox"/>
<input type="checkbox"/>
<input checked="" type="checkbox"/>

Injection Description: Injection of chemical oxidizing compounds to aid in the remediation of acetone & phenol contamination. Modification to allow injection of modified Fentons's reagent solutions

Discussion: Standard permit drafted.

1. No hazardous injection
2. Sampling point required
3. Monitoring wells must be sampled.
4. Injection activity must not result in exceedence of any MCL in groundwater
5. Due to the fact that Iron can sometimes be naturally found in levels that exceed drinking water standards and since both parameters are not normally a severe health risk, the permit will allow the discharge to continue as long as the discharge does not cause these levels to rise above the natural conditions.
